

CYBERGHOST MOVES AI WORKLOADS FROM DEDICATED SERVERS TO COLOCATION

CyberGhost

Taking control of data, security and infrastructure.

CyberGhost migrated its AI processing and data workloads from third-party dedicated servers to Freedomtech colocation to improve control, security sovereignty and long-term scalability.

THE CHALLENGE

- ✗ Limited control over data and infrastructure
- ✗ Higher operational overhead and complex vendor management
- ✗ Compliance and sovereignty challenges
- ✗ Scaling AI workloads was slow and inflexible

THE SOLUTION

- ✓ Full ownership and control of hardware, configurations and data
- ✓ Secure colocation with enterprise-grade infrastructure
- ✓ Predictable costs with no hidden charges
- ✓ Expert support for infrastructure and operations
- ✓ Global deployment options across 21 data centres

MIGRATION OVERVIEW

Third-Party Dedicated Servers

Limited control, higher complexity, slower scaling.

MIGRATION

Freedomtech Colocation

Full control, stronger security, predictable costs and global scale.

WHY FREEDOMTECH

GLOBAL FOOTPRINT

21 strategic data centres worldwide.

TRUSTED BY INNOVATORS

Businesses that value control, security and performance.

REAL SUPPORT. REAL ENGINEERS.

Expert support 24/7 from real engineers.
