

## FREEDOMTECH DELIVERS OPTIMISED INFRASTRUCTURE TO SUPPORT CAPTEC INVESTMENTS

Captec Investments, a financial company based in London with additional European offices in Amsterdam, Frankfurt, and Paris. Captec sought a partner to ensure secure data center space, internet connectivity, and configuration of hardware, firewalls, and load balancers to enhance business continuity.

### **BUSINESS CHALLENGE:**

Captec's need for a fully redundant and optimised network infrastructure to meet regulatory and compliance requirements, enabling encryption of customer data between their Data Centers in Amsterdam and London. Freedomtech was chosen to implement solutions that addressed these needs.

### **SOLUTION:**

Utilising their expertise in infrastructure deployments, Freedomtech designed, configured, built, and managed a tailored infrastructure stack for Captec, accommodating their regulatory obligations. Hardware was pre-configured and tested in Freedomtech's innovation lab prior to deployment in Amsterdam and London to ensure seamless interoperability. The network solution was then deployed by Freedomtech's smart hands team and customised according to Captec's specifications.

### **RESULTS:**

- 🎯 Enhanced operational efficiency by 25%.
- 🎯 Implementation of a global-level business continuity and redundant solution.
- 🎯 Completion of design, configuration, and building of the solution in a record time of 4 weeks.
- 🎯 Utilisation of the Innovation Lab for thorough hardware interoperability testing. successfully deployed within the given timeframes
