

KORE CONSULTING EXPANDS THEIR GLOBAL NETWORK WITH FREEDOMTECH

BUSINESS CHALLENGE:

Kore Consulting, a leading Management Consulting firm devoted to helping companies in making informed decisions regarding financial risk models, has established offices in the UK, Middle East, and South Asia.

SOLUTION:

Kore Consulting required multiple 8KW racks across various data centers in UK and Singapore to facilitate the deployment of a global network infrastructure for their big data project aimed at helping clients comprehend financial risk models through Artificial Intelligence.

With a vast network of partnerships spanning over 40 data centres globally, Freedomtech oversaw the acquisition of space and power in multiple data centres. Freedomtech were also responsible for configuring and deploying Kore Consulting's hardware into high-density racks. Leveraging partnerships with global IP transit providers, Freedomtech facilitated the provision of 40Gbps ports in UK and Singapore data centres via multiple upstream carriers. Freedomtech further aided Kore Consulting in implementing BGP across their sites and leased over 100K IP addresses. IP Asset Management (IPAM) services was provided as part of the comprehensive solution.

RESULTS:

- 🎯 Achieved a 10% annual cost saving on IP transit.
- 🎯 Assisted Kore Consulting in their BGP implementation.
- 🎯 Successfully delivered 40Gbps ports at each site.
- 🎯 Provided IPAM and IP Geolocation services to the customer.
