

GTT and Freedomtech Building a Global Partnership in IP Transit

BUSINESS CHALLENGE

Freedomtech needed to scale its global service offerings to meet the demanding requirements of its expanding customer base, including some of the world's leading VPN providers. Operating in a highly competitive market, the company faced the challenge of ensuring secure, efficient, and reliable infrastructure management. To deliver on client expectations, Freedomtech required a resilient IP transit backbone, low-latency connectivity, and a scalable network capable of supporting rapid growth across multiple regions.

SOLUTION

To overcome these challenges, Freedomtech partnered with GTT as its primary IP transit provider. Over the past three years, this collaboration has enabled Freedomtech to:

- Deliver large-scale IP transit services and critical subnet provisioning.
- Establish eight strategic points of presence across the United States and the EMEA region to enhance global reach.
- Leverage GTT's reliable and resilient backbone to optimise network performance with low latency and high robustness.
- Benefit from GTT's proactive account management, combining technical expertise with professional guidance to support continued scaling.

RESULTS

The partnership with GTT has delivered significant outcomes for Freedomtech and its clients

- Scalability & Growth: Supported rapid customer expansion with access to a high-performance global network.
- Operational Excellence: Ensured fast, secure, and reliable connectivity essential for VPN providers and global enterprises.
- Business Value: Positioned Freedomtech as a trusted and innovative service provider by delivering measurable ROI for clients.
- Strengthened Partnership: GTT's professionalism and expertise have provided Freedomtech with the confidence to focus on delivering excellence whilst knowing its network infrastructure is in safe hands
